closed weak and near the lowest of the day. The final trading was active ort Riley, in Montagan. Oh, yes, beg pardon, of course, ort Riley was in Karisas, of course, ort Riley was in Karisas, of course everybody knew that, but the reporter really must excuse him; ever since that big Ignoronte in the Island of Manchuria fetched him that welt over the head and left him for dead, the Captain's memory for places had been bad. Would the reporter like to feel of the dent? No? Then have a photograph.

But the reporter was a low, sneaking, suspicious cuss and he kopt on writing mean, sneering pieces in the paper until finally last night the truth came gut, the cold, deadly appailing truth. Captain Samilson, West Pointer, had had the compass points mixed all along. He meant Five Pointer. But he told Miss Brosland that he could love her just as much as Romey, the butcher boy salary 8x a week, as he had as captain in the army. She couldn't see it that way and to-day the brothers Brosland were prepared to formally break the canagement—with an axe.

"Conned" the East Side.

## The Truth about Mutual Life

HIS is a matter of great interest to the public, and of still greater interest to thousands of individuals. People with the fairest minds-and that means most people-have been disturbed and unsettled by the developments and denunciations of the past few months. What these people want is the truth-the plain unvarnished truth. To give them this truth is the object of this announcement.

The Mutual Life Insurance Company was organized in 1843, the first of its kind in America. In 24 years it had become the largest in the world. For 39 years, in spite of the keenest competition, it has held the lead, passing unharmed through panics, failures, strikes and wars; meeting with promptness its every obligation and having 460 millions of assets to-day.

The recent Insurance agitation was unique. The investigation certainly was thorough. As every one knows the Mutual Life was on the firing line. The smoke has now cleared away. What do we find?

In the first place we find that the Mutural Life is still the largest and staunchest Life Insurance Company in the world. Without defending or in the least belittling the abuses and extravagances recently brought to light, everybody should keep in mind the fact that the solvency of this Company has not for a moment been affected thereby. Concerning the work of the finance committee which has been attacked in the press, this Company's auditing committee consisting of Messrs. Truesdale, Auchincloss, Fish and Dixon stated on February 15th, 1906:

"The Committee certify that the investments of the Company are of the highest order and well selected." and "have found the valuation given safe and conservative, in many instances less than the market value and in none in excess of such value.

In the next place, extravagance has been stopped, and those responsible for it have gone; a new management has been installed, and retrenchments have been effected that have already saved vast sums of money and will save much more as time goes on. Legislative reforms have likewise been anticipated, and the Company is now as sound at the circumference as it always has been at the core.

In the next place, the ending of the first quarter presents an excellent opportunity for comparing this year with last.

The amount paid policy holders is \$9,608,436.50, an increase of \$1,070.835.26. The receipts for premiums were \$15,082,484.57, a decrease of \$857,995.29 for the period. This is a shrinkage of less than 5\frac{1}{2} per cent. The amount paid for expenses was \$2,935,552.44, a reduction of \$1,547,279.36.

This remarkable showing is a good thing to be kept in mind by everybodythose now insured in the Mutual Life, and those who should be. It cannot be accounted for by the smaller amount of new business written. Of the saving for the quarter, the sum of \$390,961.52 is in items not connected with the obtaining of new business.

In the next place we find that this Company is doing businessmore business than any other company in the world with one exception. Far from being paralyzed or demoralized it is forging right ahead. Policies by the hundred are being written each day; honest trustees, keenly alert, are directing its affairs; faithful and experienced men are doing its intricate work; loyal agents are explaining its advantages and discriminating people are obtaining its protection.

In the next place we find that there need be no question as to the future. A policy in the Mutual Life is just as good as gold. No obligation could possibly be better. A bond of the United States Government is no safer. It will, therefore, be a misfortune if any one is misled by the writer who prints for revenue or for notoriety, or by the attorney who is out for his clients, or the competitor who is out for himself, or even by the gentlemen who have organized themselves into committees under an honest misapprehension of the facts. Such incidents may tend to hinder business, but need deter no one who needs insurance.

With economy, which means rapid improvement in regard to carning of surplus for dividends, everywhere at work in the Mutual Life; with its immense size as the basis for moderate general expenses; with smaller liability for renewal commissions to agents than any other Company; with the cost of new business limited by law for all Companies, how can any one possibly better provide for the uncertainties of the future than through a policy in the first Insurance Company in America, and the strongest in the world-

The Mutual Life Insurance Company of New York New York

The Mutual Life has devised and placed on the market at a notably low rate, a policy which provides protection more far-reaching than an ordinary contract. Send your address and let us inform you as to the particulars.
